SafeBot /24

Complete system for automatic 24/7 Self service safe deposit systems

24/7 Self service safe deposit systems

"Tower dispense and/or at-grade dispenses possible"

SafeBot /24 is a **24/7 Self service safe deposit system** developed to fulfil all requirements of a complete automatic Self service safe deposit system. With our storage system vaults can be used efficiently. Tower dispenses facilitate additional space in the customer area of your branch.

Our accomplishments

Planning, conception and implementation of the vault

Safe deposit robot SafeBot /24

Storage system with individual locker assignment

Lockers in 4 sizes: Hight 50-230 mm | width: 240 mm | depth: 360 mm

Dispensing: at-grade or at tower

Access terminals in different implementations

SafeNet 10: Software for administration and control of mechanical or rather Self service safe deposit systems

Your benefits

A software for all SafeBot systems – higher quality and faster teaching phases

By using the same power units and regulations in the different SafeBot 24 systems the number of needed spare part types can be kept low

Spare parts guarantee for more than 10 years

Maintenance agreement: Full service assistance possible

Maintenance, service and support for all 24/7 Self service safe deposit systems and software - Europe-wide

FLEXIBLE STORAGE SUBDIVISION
"Two lockers behind one another…"

Performance features

- Access to the lockers in a 24/7 business
- Maximum availability/reliability of operation
- Dispensing: at-grade or at tower
- Freely eligible storage raster (locker hight: 50-230 mm)
- Planning, conception, installation and maintenance through Contecon
- Hardware and software developed and maintained by Contecon

Potential savings

- Space saving – two lockers behind one another
- Tower dispensing units enables installing the vault in the cellar

Safe deposit boxes

- Height: 50, 110, 170 or 230 mm | width: 240 mm | depth: 360 mm
- Maximum lifting force: 25 kg
- Sizes freely placeable in the storage raster
- Storage subdivision can easily be changed later

Options

- Additional dispensing units on request
- Dispensing units at the side, in front, in the back, at-grade as well as tower dispensing possible
- Different access terminals
- Individual maintenance agreements
- SafeNet link to the computing centre (e.g. OSPlus)

LOCKERS COMPLETELY MADE OF STEEL
"Heights between 50 and 230 mm…"
